

Laboratoire Léon Brillouin, CEA-CNRS

Orphée Reactor, Saclay, France - www-llb.cea.fr
French National Neutron Scattering Facility

21 spectrometers available, 600 visitors,
450 experiments performed annually

Three scientific axes:

- Soft Matter and Biophysics
- Strongly Correlated Quantum Materials and Magnetism
- Materials and Nanosciences: Fundamental Studies and Applications

nmi3 providing transnational ACCESS to 10 neutron and 2 muon facilities

Integrated Infrastructure Initiative for Neutron Scattering and Muon Spectroscopy
NMI3 project supported by the European Commission under the 7th Framework Programme
INFRA 2008 - 1.1.1 Bottom up approach integrating activities in all scientific and technological fields.
Research Infrastructures action. Contract No: 226507- NMI3
