

Nuclear Physics Institute

Neutron Physics Laboratory

- Seven unique facilities for neutron scattering and neutron activation analysis.
- In-situ load tests, high- and low- temperature neutron scattering experiments and excellent neutron optics.
- Activation analysis, depth profiling of certain elements and fundamental nuclear physics.
- Full support to external users from in-house scientists .

nmi3 providing transnational ACCESS to 11 neutron and muon facilities

Integrated Infrastructure Initiative for Neutron Scattering and Muon Spectroscopy
NMI3 project supported by the European Commission under the 7th Framework Programme
INFRA 2008 - 1.1.1 Bottom up approach integrating activities in all scientific and technological fields.
Research Infrastructures action. Contract No: 226507- NMI3
